

Future Directions Growth

Quarterly Investment Option Update

31 December 2020

Aim and Strategy

To provide high returns over the long term through a diversified portfolio investing, mostly in shares with some exposure to alternative assets and property. The portfolio aims to achieve a rate of return above inflation after costs over a 5 to 7-year period.

Suggested minimum investment timeframe	6 years
Relative risk rating	High
Investment style	Active
Manager style	Multi-manager

Asset Allocation	Benchmark (%)
International shares	38
Australian Shares	32
Growth Alternatives	12
Unlisted Property and Infrastructure	6
Listed Property and Infrastructure	4
Australian Fixed Interest	3
International Fixed Interest	3
Cash	2
Defensive Alternatives	0

Actual Allocation	%
International Shares	38.38
Australian Shares	32.78
Listed Property and Infrastructure	2.13
Unlisted Property and Infrastructure	5.78
Growth Alternatives	7.41
International Fixed Interest	7.29
Australian Fixed Interest	1.97
Defensive Alternatives	0.06
Cash	4.19

Fund Performance

The Fund delivered a strong positive return over the December quarter, continuing an impressive rebound since the March quarter lows, to finish the year on an encouraging note. As has been the case since the second quarter of 2020, the momentum of growth assets has continued to drive the strong Fund performance. Overall, the Fund underperformed the benchmark but comfortably exceeded its CPI objective over the quarter.

Geopolitics, stimulus relief and COVID-19 news dominated investor sentiment over the quarter. In the US, political uncertainty was quelled, as Joe Biden was confirmed by the electoral college as the President Elect of the United States. Additionally, the signing of the economic stimulus relief bill, aptly titled the CARES Act, provided further reprieve and economic support. On the COVID-19 front, despite a worrying uptick in cases in the northern hemisphere, the announcement of three effective vaccines added fuel to the post-US election rally, leading to a strong finish to the year. Overall, the S&P/ASX 200 index ended the quarter up 13.7%, while the MSCI World ex Australia index closed up 12.7% (in local currency terms), with cyclical segments of the market and small cap stocks among the key winners. Government bonds were generally unchanged as yields were largely range bound, while credit markets rallied due to the 'risk-on' tone. Unlisted assets and alternatives also saw gains.

Relative to benchmark, the Fund underperformed over the quarter, as stock selection was a drag on performance. Allocations to private equity detracted, as private company valuations lagged rallying public share market benchmarks, however this underperformance should be clawed back overtime. Broad share market exposures were also mixed as quantitative strategies such as quality, growth and momentum signals underperformed value.

Market Review

December saw some closure and improved visibility on issues that had been weighing on the market for most of 2020. Despite further COVID-19 waves, breakouts and new strains, tangible plans for vaccine rollouts in 2021 showed an improved path to normalcy. In Europe, a Brexit deal was finally agreed and signed. All-in-all, the global environment imparted a more positive backdrop at the tail-end of the year which kept equity markets supported. However, many equity markets now look stretched and signs of excessive optimism have been reflected in IPOs often trading significantly above their launch valuations, with sketchy or sometimes zero profitability.

Ahead of the US presidential election global equities exhibited mixed performance as the initial acrimonious presidential debate impacted market certainty and support. After a protracted count, Democratic candidate Joe Biden won the election, although it took significant time for the Trump administration to tacitly accept defeat and agree to co-operate with a transition of power. Post the US election, global equity markets were buoyed by increased political certainty and positive news on several viable COVID-19 vaccines.

Global markets will be looking ahead to 2021 hoping than the impact of 2020 will be able to be reversed as soon as possible once vaccine programmes start to make their full effect felt.

Outlook

Looking ahead, we remain cautiously optimistic for 2021. The continuation of easy monetary policy, fiscal stimulus, rollout of vaccines and the resolution of many geopolitical concerns, which benefitted markets in 2020, should continue to do so in the new year. However, the sharp 'V-shaped' recovery has left markets somewhat susceptible to a correction. As such, holding an active, well-diversified asset exposure to both growth and defensive assets will continue to provide support should volatility return. We prefer cash at the expense of bonds given the low yield environment. All other asset classes are at neutral allocations.
